## **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 31, 2007 has been entered.

Claims 1-36 are pending in this application.

#### Election/Restrictions

Claims 1-3 and 14-17 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 4-8 and 18-36, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 9-13, directed to the invention(s) of Groups VI-X, drawn to intermediate compounds of formula (Ib) or formula (Id), do not require all the limitations of an allowable product claim, and have NOT been rejoined.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, the restriction requirement between groups I-V and XI-XIV as set forth in the Office action mailed on May 10, 2006 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised

Application/Control Number: 10/827,368

Art Unit: 1624

that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 9-13 (drawn to intermediate compounds of formula (Ib) or formula (Id) and the corresponding process of preparation) remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions (for the reasons previously provided for inventions of Groups I and VI-X, see the office action of May 10, 2006), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on June 21, 2006.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2, 4-8 and 14-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

1. In claim 1, the recitation - "A pyrimidone of the formula (I) and their pharmaceutically acceptable salts" is not proper Markush language. The claim should properly recite: -- A

Application/Control Number: 10/827,368 Page 4

Art Unit: 1624

pyrimidone of the formula (I) and their or its pharmaceutically acceptable salts salt --.

The discrepancy appears in claims 4 and 5 as well.

- 2. Claim 2 recites the limitation "the ring systems represented by A and B are selected from ... pyrrolidinyl, morpholinyl, thiomorpholinyl, piperidinyl, piperazinyl" in lines 2-3. There is insufficient antecedent basis for this limitation in claim 1 on which claim 2 is dependent. According to claim 1, 'the rings represented by A and B are selected from aryl or heteroaryl' and the above ring systems recited in claim 2 are fully saturated or non-aromatic.
- 3. Claim 6 recites "... to **novel** pyrimidones of the formula ..." in line 5, wherein the term 'novel' is not appropriate.
- 4. Claim 7 recites "... to **novel** pyrimidones of the formula ..." in line 5, wherein the term 'novel' is not appropriate.
- 5. Claims 18-36 provide for the **use** of the compound of formula (I), but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

# Claim Rejections - 35 USC § 101

Claims 18-36 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for

example Ex parte Dunki, 153 USPQ 678 (Bd.App. 1967) and Clinical Products, Ltd. v. Brenner, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

## Allowable Subject Matter

Claim 3 is allowed. Claims 1-8 and 14-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deepak Rao whose telephone number is (571) 272-0672. The examiner can normally be reached on Monday-Friday from 8:00am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson, can be reached at (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
